

Meicheng Solar Power Generation

Overview

Solar-powered lights from Meicheng are designed to harness the sun's energy, transforming it into usable light for various purposes such as garden decoration, security, or general outdoor illumination. Meicheng Li is a professor/doctoral supervisor, the Dean of the school of new energy of North China Electric Power University. He has been the Yangtze River scholar professor, leading talents in science and technology of national ten-thousand-person plan, leading talents of young and middle-aged in. D Wei, F Ma, R Wang, S Dou, P Cui, H Huang, J Ji, E Jia, X Jia, S Sajid.

Meicheng Li (North China Electric Power University; Harbin Institute of

Abstract: Planar perovskite solar cells (PSCs) show huge promise as an efficient photovoltaic technology, where the inefficient carrier transport at the hetero-interface largely limits their performance advancement.
