

Micro Solar Pumps in the Central African Republic

Overview

Solar-powered water pumping systems are revolutionizing agriculture and water access in rural Africa. These systems use photovoltaic panels to power pumps that draw water from underground sources or rivers, enabling irrigation and drinking water supply without reliance on. Clean water is a necessity, not a luxury Aptech Africa is thrilled to announce the successful installation of construction of 3 boreholes equipped with solar pumps, with the construction of a 600m irrigation system. 5-2 pumps were used in the installation and the Grundfos CU200. Aptech Africa recently commissioned a 1. Choosing the right supplier is key to long-term success.
