

Microgrid Industry Policy

Overview

This brief includes keys to barriers, potential solutions, and next steps to advance microgrid deployment. Authorized by Section 40101(d) of the Bipartisan Infrastructure Law (BIL), the Grid Resilience State and Tribal Formula Grants program is designed to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate. The Think Microgrid 2024 State Scorecard uses an evaluation framework that considers five fundamental criteria, each of which is critical to understanding today's market and future opportunities: deployment, policy reform, resilience, market development and equity. The 2024 Scorecard was enhanced. The U. 82 billion in 2024 and is projected to grow at a CAGR of 18. Market growth is being propelled by rising investment in grid resilience, the growing need for localized energy systems, and the transition toward renewable. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.zinaman.com, Owen, Joseph Eto, Brooke-Garcia, Jhi-Young Joo, Robert Jeffers, and Kevin Schneider. 7-2017 [2] defines microgrids as flexible systems of interconnected loads and distributed energy resources (DERs), such as solar panels, wind turbines, and battery energy storage systems.
