

# Middle East Energy Storage Work Plan

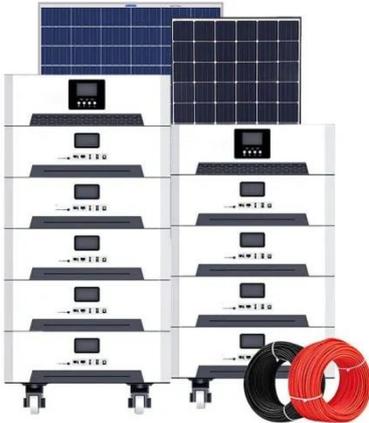

## Overview

---

Leveraging the capital strength of its sovereign fund (PIF) and abundant sunlight in the desert region (over 3,000 hours of sunshine annually), Saudi Arabia is creating a core energy storage hub in the Middle East through policy relaxation (such as 100% foreign ownership). Leveraging the capital strength of its sovereign fund (PIF) and abundant sunlight in the desert region (over 3,000 hours of sunshine annually), Saudi Arabia is creating a core energy storage hub in the Middle East through policy relaxation (such as 100% foreign ownership). commissioned over 100 MW of sodium-sulfur (NaS) battery units at 10 locations. Batteries store surplus electricity during off-peak hours and release it during ent includes the region's largest battery energy storage system, at 1. The system delivers a secure and resilient power supply solely. ition in the MENA region since its inception in 2009. This includes enabling physical clean energy infrastructures, emerging clean energy markets and fast and secure information systems to ensure ntegrity and efficiency of the energy transformation. The region has long been a cornerstone of the global energy system., and Siddiqa Batool, Analyst at PTR Inc. With countries like the UAE and Saudi Arabia pursuing ambitious renewable energy goals, storage. Saudi Arabia and the UAE have emerged as two of the world's most prominent energy storage markets, with mega-scale projects announced and moved forward at a staggering pace over the last two years.
