

Mobile Energy Storage Container DC for German Highways

Overview

Germany's Power to the Road project aims to decarbonise transport with a vast fast-charging network for heavy-duty EVs, aligning with EU climate goals. Germany's Power to the Road project aims to decarbonise transport with a vast fast-charging network for heavy-duty EVs, aligning with EU climate goals. Energy storage containers for charging stations are emerging as game-changers, offering scalable power solutions that keep EVs moving. This flexible, modular solution is highly adaptable to the specific needs of different energy projects, making it a key. The Charge Qube is a revolutionary rapidly deployable Mobile Battery Energy Storage System and Mobile Electric Vehicle Supply Equipment (Type-2 or CCS) designed to meet the diverse and demanding needs of businesses, fleets, and infrastructure projects. The Battery Energy Storage System (BESS) combines safety, scalability, and flexibility for use in industry and commerce. Over the next four years, a total of over five million euros will flow to Frankfurt Airport within the scope of Germany's program to promote.

Mobile Energy Storage Container DC for German Highways

2MW / 5MWh
Customizable

Fast charging of mobile energy storage containers for highways

German battery manufacturer Tesvolt supplied two energy storage containers with a total capacity of 2 microwatts to temporarily store excess solar and wind energy and reduce the costly peak
