

# Modular battery cabinet for battery swapping stations

## Overview

---

Battery swap cabinets intended for global markets should use modular architectures, corrosion-resistant materials, and compliance documentation supporting multi-region certification. This product targets the three core pain points of low charging efficiency, frequent safety hazards, and insufficient energy replenishment facilities in the electric vehicle industry. Innovate the modular battery swap mode of "vehicle and electricity separation". Relying on intelligent battery. In battery swap cabinets, E2W batteries arrive with unknown charge histories, usage patterns, and thermal conditions, increasing the risk of unpredictable incidents without proper monitoring and screening systems. Our capabilities include: laser cutting, CNC forming, precision welding, powder coating, screen. Offering rapid battery swaps, robust power management, and compatibility with various electric vehicles, these advanced battery swap systems feature IP55-rated protection, intelligent BMS with multiple safety layers, and seamless communication modes.
