

Mogadishu Hospital uses 120kW collapsible shipping container

Overview

Built from repurposed shipping containers, these clinics are strong, durable, and easily transportable. This mobility allows for quick deployment, meaning they can become operational within hours of arriving at a destination. COLLAPSECON is the next evolution of shipping containers – a fully automated collapsible container that will improve operational efficiencies, deliver economic savings and reduce environmental impact across the supply chain, all without requiring a fundamental change to the industry or global. GenFlat collapsible containers (“GenFlats”) are built from mildsteel and Corten, giving them a strength and rigidity that exceeds industry standards. What is a Container Hospital?

A container hospital is a modular medical facility built. Shipping container medical clinics/hospitals are revolutionizing healthcare delivery due to their affordability, portability, and customization options. They come with cutting-edge technology and offer a range of usage possibilities. As renewable energy adoption accelerates globally, Mogadishu faces unique challenges in balancing power supply and demand.
