

# Moldova energy storage vehicles are affordable

## Overview

---

There's a widespread misconception that EVs are too expensive or that the charging infrastructure in Moldova is still too sparse. Let's clear that up: #pros# The average price of an electric car in Moldova has dropped by 20% thanks to subsidies, making it accessible for more families. Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE) with a capacity of 22 MW to strengthen the country's energy security. The United States Agency for International Development (USAID), through the Moldova. The facility will produce equipment for charging stations and energy storage systems for electric vehicles, with a strategic export orientation towards the European market. ) and about 70% of its electricity demands. To transition towards a carbon-neutral future, the Republic of Moldova should untap its renewable energy potential and invest in renewable energy. The US will invest €78. Secretary of State Antony Blinken announced up to €78.
