

# Mumbai india 2025 energy storage inventory

## Overview

---

Between 2022 and May 2025, India auctioned approximately 12.8 GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219 MWh of BESS capacity is reported to be operational, leaving a large pipeline of projects under. As per Market Research Future analysis, the India energy storage market size was estimated at 3152.63 USD Billion in 2025 to 38224.85 USD Billion by 2035, exhibiting a compound annual growth rate (CAGR). An energy storage system provides a stable round-the-clock power supply by harnessing energy when sunlight/wind is abundantly available and releasing it when production is low. Traditional energy storage systems like Lithium-ion batteries are expensive, have safety concerns and depend on rare. Guided by our National Electricity Plan and bold climate pledges, we aim to achieve 500 GW of renewable energy capacity by 2030—a goal that reflects our resolve to lead globally in clean energy. 8 lakh residential and commercial consumers, has received approval from the Maharashtra Electricity Regulatory Commission (MERC) to install a 100 MW Battery Energy Storage. The National Statistics Office released its annual "Energy Statistics India 2025" publication, offering a comprehensive dataset on India's energy sector. This report includes vital information on reserves, capacity, production, consumption, and trade of various energy commodities. The following sections detail the top 10 news stories shaping this dynamic market, followed by viral LinkedIn.
