

# Nauru grid-connected battery energy storage system

## Overview

---

The Solar Power Development Project will finance (i) a grid-connected solar power plant with a capacity of 6 megawatts (MW) of alternating current; and (ii) a 2.5-megawatt-hour, 5 MW battery energy storage system (BESS) to enable smoothing of intermittent solar energy. The system will be fully supported by GHD in partnership with the Asian Development Bank (ADB) and the Government of Nauru to reduce the country's reliance on diesel, by sourcing nearly 50 percent of the country's energy from renewable sources. This isn't just tech jargon; it's about survival for 10,000 islanders facing a dire energy storage combination.

## Energy Storage Revolution: Solving

...

Wait, no--it's not just about storing energy. The real challenge lies in creating grid-resilient systems that can handle sudden load changes. That's where lithium technology steps in.
