

Netherlands Lithium Energy Storage Power Supply Procurement Project

To Strive forward No Energy Waste

- ✓ All in one
- ✓ 100~215kWh High-capacity
- ✓ Intelligent Integration

Overview

Tesla served as the engineering, procurement, and construction (EPC) partner, while eneco has been designated as the system operator. A unique market Model Revenue Index (MMRI) offtake agreement was established, allowing the project to capitalize on market opportunities within. Lion Storage has received a construction permit for a 347MW/1,457MWh BESS project while Giga Storage hopes to start construction on a similarly sized one this year, representing a major step forward for the grid-scale energy storage market in the Netherlands. Through this project, the EIB will support increased flexibility of the power system, thereby ensuring security of supply which has public goods attributes, and facilitating the integration. Tesla will provide 372 of its MegaPack 2 XL battery systems as well as engineering, procurement, and construction (EPC) services. With a total capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt hours (MWh), the battery will be used to balance power supply and demand in the Dutch power grid. TINC, the infrastructure investor listed on Euronext Brussels, announces a € 61 million investment in Project Mufasa, one of the largest battery energy storage systems (BESS) in the EU. APX-Group: In 2015, the Amsterdam Power Exchange (APX) merged with the European Power Exchange (EPEX SPOT). Participants: Distributors, producers, traders and industrial end-users.

Netherlands Lithium Energy Storage Power Supply Procurement Procurement

Pioneering for largest battery energy storage system in the Netherlands

A battery energy storage system of this size is a premiere for the Netherlands. The installation can store green electricity from offshore wind farms for more than 200,000 households.
