

New Rural Microgrid

Overview

The latest trends in renewable energy microgrids for rural communities in the US include advancements in battery storage, smart grid technologies, and a focus on community-owned projects to enhance energy independence and sustainability. The Infrastructure Investment and Jobs Act (IIJA), signed into law in November 2021, is a \$1 billion allocation for the Energy Improvements in Rural or Remote Areas (ERA) program. Created by the Department of Energy's (DOE's) Office of Clean Energy Demonstrations (OCED). This coalition of rural electric cooperatives seeks to develop resilient, reliable and economically beneficial microgrid and storage projects for their communities. Billions of dollars from the bipartisan infrastructure law have been allocated to improve electric grid resilience in rural areas and. The Office of Electricity (OE) is launching a program, the Community Microgrid Assistance Partnership (C-MAP), to provide support to underserved and Indigenous communities in remote, rural, and islanded regions. In the summer of 2023, an unfamiliar sound spread through the village: silence. These systems provide reliable power, support local economies, and lower carbon emissions in rural areas. Over 800 million people lack reliable.
