

New Zealand solar system export tariffs

Overview

Find out the latest price-per-unit buy-back rates that energy retailers around New Zealand offer for your excess / exported solar power & calculate your ROI. A power export tariff is the price you receive when you send surplus electricity, generated by your solar panels, back to the national grid. When your solar system produces more power than you need, it's fed into the grid, and in return, you are compensated by your energy provider. Feed-in tariffs (FITs) are similar but are often set by government policy to encourage renewable energy by guaranteeing a. It's also known as a buy-back rate or export tariff. How Does Selling Power Back.
