

Nissan battery energy storage

Overview

The company has launched a Battery Energy Storage Solution (BESS) project at its Americas Headquarters in Franklin, Tennessee. This project utilizes used LEAF batteries to help offset the building's power consumption, contributing to Nissan's ambitious goal of achieving carbon. Nissan Americas Headquarters in Franklin, Tennessee, is adding two second-life battery systems to help offset building power consumption and extend the use of electric vehicle batteries. By partnering with Eaton, we provide scalable energy storage systems fit for your homes and your business, allowing all of us to benefit from the transition towards a more sustainable society. Electric vehicles (EVs) are transforming transportation and promising massive gains toward zero-carbon goals.
