

# Off-grid installation solution for energy storage containers used in base stations

## Overview

---

It integrates solar PV, battery storage, backup diesel, and telecom power distribution in one standard container. Strong storage: Up to 50 kWh capacity, perfect for long. Highjoule's HJ-SG Series Solar Container was built for one purpose: keeping base stations running where there's no grid power. Among the most scalable and innovative solutions are containerized solar battery storage units, which integrate power generation, storage, and management into a single, ready-to-deploy. Enpack is a customized containerized microgrid solution developed by Emtel Energy, powered by Enercap, designed to function as both an EV charger and a grid-independent energy supplier. It can be deployed from kWh to MWh and supply power to any application. Available sizes include 10ft, 20ft, and 40ft. The on-site installation is undertaken by the Off-Grid Installer team and after all clients are included in the online remote monitoring service. The whole system is plug-and-play, easy to be transported, installed and maintained.
