

# Old solar power generation base

## Overview

---

17 former coal mines in the US are being transformed into clean energy hubs, featuring 14 solar farms and three battery storage sites. These projects provide a pathway to a sustainable, economically viable future for energy communities, preserve jobs and provide clean energy to meet. A collaborative effort involving The Nature Conservancy (TNC), its Cumberland Forest Limited Partnership, Sun Tribe Development, and ENGIE is set to revitalize 17 former coal mining sites across Appalachia, converting them into clean energy ventures. This initiative will include 14 solar energy. In 2018, ENGIE North America and Massachusetts public power utility Holyoke Gas & Electric unveiled a utility-scale energy storage system at a ceremony at the Mt. Tom Solar Farm in Holyoke, Massachusetts. Owned and operated by ENGIE North America, the Mt. A recent analysis by Global Energy Monitor (GEM) highlights that these derelict lands could be repurposed for solar installations, thus turning a negative.
