

# Photovoltaic Foldable Container DC Power Used at Drilling Sites in West Africa

Modular design,  
unlimited combinations in parallel

**BUILT-IN DUAL FIRE PROTECTION MODULE**

## Overview

---

The foldable photovoltaic panel container has become an ideal choice to solve the power supply problem in remote areas due to its convenience and efficiency. Besides meeting the demand of energy in different scenarios, this container will enable optimized utilization of resources by introducing module design and a powerful electricity generator. LZY's photovoltaic power plant is designed to maximize ease of operation. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Through a highly integrated design, it condenses power generation, energy storage, control, and transmission systems within a standard shipping container, achieving mobility. The containerized mobile foldable solar panel is an innovative solar power generation device that combines the portability of containers with the renewable energy characteristics of solar panels.

## Photovoltaic Foldable Container DC Power Used at Drilling Sites in V

---

### Containerized foldable photovoltaic power station

Through a highly integrated design, it condenses power generation, energy storage, control, and transmission systems within a standard shipping container, achieving mobile and rapid ...
