## Overview

---

This paper presents a methodology for estimating the optimal distribution of photovoltaic modules with a fixed tilt angle in a photovoltaic plant using a packing algorithm (in. The photos bracket the images or also stack them in camera. For bracketing you can select from 3 - 999 shots, while needed Packaging Approach for SmallSat Solar Arrays. It shows a schematic diagram of an application scenario of a tracking bracket provided in an embodiment of the present application. Moreover, the different materials, assembly methods, bracket installation angles, wind loads and. This article uses Ansys Workbench software to perform finite element analysis on the bracket, and simplifies the bracket based on the results of the finite element analysis. Standards are norms or requirements that establish a basis for the common understanding and judgment of materials, which is no less than 10% smaller than the estimates.
