

Photovoltaic panel 90 degree flip mechanism

Overview

90-Degree Rotation: it automatically rotates the laminated solar module by 90 degrees in its plane. Facilitate Manual Inspection: This rotation presents different edges and surfaces of the laminated module to a human inspector, making it easier to visually examine all sides for. The ECOVISUAL 90°, a semi-automatic Visual Inspection Station for Solar Panel Production, is designed to elevate the quality control process in solar panel manufacturing. This station facilitates efficient inspection right from the start by rotating solar panels towards the operator, making it. Conveying method: synchronous belt conveyor assembly with positioning function. After the assembly enters the equipment, the assembly is lifted and rotated 90° for appearance (glass side) inspection and cleaning.

Photovoltaic panel 90 degree flip mechanism

90° FLIPPING MACHINE · Double100

Once confirmed, the assembly is rotated to ensure that the grabbing action does not cause bending or vibration of the assembly. The motion is smooth, and after 90° rotation, the assembly is placed back ...

Visual Inspection for Solar Panels Quality Control

This station facilitates efficient inspection right from the start by

- LiFePO₄
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years

rotating solar panels towards the operator, making it easier to identify any issues and clean the panels.
