

Photovoltaic panel custom specifications

Overview

This tool helps users create a solar panel that is the proper power, durability, and footprint for their specific application. We work with you to understand your dimensional, power and. That's why we create custom solar panels designed to match your exact needs. Complete solutions from less than 1 to 100+ Watts, Rigid or Flexible Designs. The manufacturing capabilities support arbitrary shapes, curved surfaces, and application Power monocrystalline cells. For projects requiring alternative cell technologies (perovskite on silicon, GaAs, CIGS, HJT.), contact our team for specific values) cell.
