

# Photovoltaic panel lithium battery control

## Overview

---

A solar charge controller regulates the voltage and current coming from your solar panels to your batteries, ensuring the batteries are charged properly and safely. In this article, you'll discover the key factors to consider when selecting a solar controller tailored for lithium batteries, helping you make an informed decision that. Take charge of your solar power system with LiTime's charge controller for solar panel setups—advanced MPPT & PWM options with real-time monitoring and auto battery detection. Kits for RVs, boats, and home solar charge 12V/24V/36V/48V, built tough for harsh environments. Perfect for mobile, off-grid, and home use, they connect easily with other Victron components to build your ideal solar setup, providing battery protection and optimising charging cycles. In this guide, we'll walk you through the process, covering the essential settings for bulk, absorb, equalize, and temperature compensation.

## Photovoltaic panel lithium battery control

### Solar charge controllers

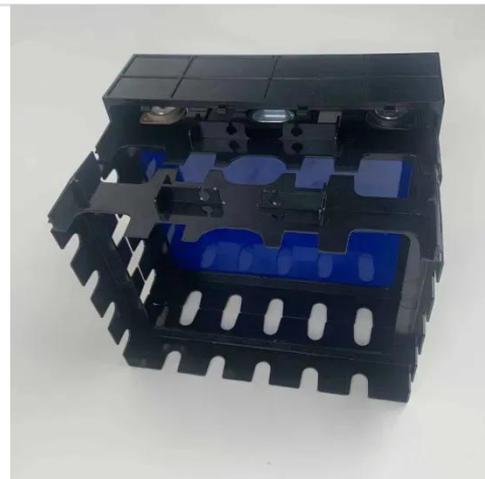

Ensure your solar panels harvest every bit of energy with our MPPT and PWM solar charge controllers. Perfect for mobile, off-grid, and home use, they connect easily with other Victron components to build ...
