

Photovoltaic panel scaffolding worker

SMART GRID & HOME

Overview

Scaffolding for solar panels refers to the temporary structures erected to provide safe access to rooftops during solar panel installation. Place the solar panel in the hoisting installation of the scaffold lift and hoist the panel to the desired height using the hoisting rope. Developed for simple and safe hoisting of solar panels. The solar lift is available as a separate. Workers who install and/or maintain solar panels often work on roofs, use ladders and scaffolding, are in proximity of ledges and sunroofs, and are exposed to fall hazards.
