

Photovoltaic panels raised

Overview

The elevated design structure, also known as a high-rise solar module mounting structure, improves solar efficiency while using less amount of roof space. Solar panels are placed at a height of 6 to 8 feet above ground level. Mounts for roof, ground, pole and carport mounted solar PV systems at low wholesale prices. Whether a solar roof mount, ground mount, top of pole mount, side of pole mount, tower mount or. Solar energy is the most cost-effective and long-term solution for lowering our electricity bills and carbon footprint among all renewable energy sources. energy bills while also being environmentally friendly. Unlike traditional roofing materials that require penetrations through the roof surface. Standing seam metal roofs offer an ideal surface for installing PV modules. It combines aesthetics, functionality and sustainability in an innovative system - ideal for modern architectural projects with high standards of design and energy efficiency.
