

Photovoltaic panels with beams on the roof

Overview

Roofs are the best spot for solar panels to get good sunlight and generate power for your home. Check your roof's strength before installing, especially on older homes. Proper sealing of these screws is. Solar panel mounting on a roof combines engineering, weatherproofing, and local code compliance to secure photovoltaic (PV) systems safely and efficiently. Normally, just two of these beams slope down from the peak or hip of the roof and meet the walls.
