

# Polish energy storage battery exports

## Utility-Scale ESS solutions

## Overview

---

Lithium-ion batteries already account for more than 2.4% of all Polish exports and contribute around 3% to the country's GDP. This makes the sector one of the key pillars of the national economy and a strategic driver of European electromobility. <sup>1</sup> The AutoMotive & Electromobility Sector, Poland Investment and Trade Agency. Accessed: August 2025 A key enabler of this manufacturing strength is Poland's substantial and skilled. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects. 5 GW was contracted. Poland's energy storage landscape has become a battleground between ambitious climate targets and practical grid economics. This year's event saw a significant presence of Tier 1 BESS Original Equipment Manufacturers (OEMs). In the same month, the export volume of solar and energy storage inverters reached 3,803,000 units, experiencing a 30% year-on-year decrease but a notable 22% month-on-month increase. Additionally, the average price per unit stood at \$147.
