

# Port of spain plug-in electric vehicles phevs

## Overview

---

This report presents a comprehensive overview of the Spanish plug-in hybrid electric vehicles (phevs) market, the effect of recent high-impact world events on it,, and a forecast for the market development in the medium term. After a challenging 2024 (with a year-on-year decline of 3. Supported by expanding model availability, corporate fleet electrification, and gradual improvements in. The Spanish government has reactivated its EV-subsidy scheme 'MOVES III'. It will run until December 31 of the current year. Plug-in hybrid (PHEV) deliveries dropped 7% last month to 5,559 units, while battery-electric vehicles (BEVs) slumped 3% to 4,203 registrations. Both technologies followed the overall market performance in March, where registrations fell. Moves III offers subsidies for individuals who purchase an electric car of up to 7,000 euros. According to the Ministry of Economy and. Operating under a multi-stakeholder, dialogue-research-action framework, alinnea seeks to develop solutions that overcome climate action barriers while ensuring they are socially just, economically viable, and beneficial for the environment and biodiversity protection.
