

# Portable energy storage export

## Overview

---

The global energy storage market has grown by 24% annually since 2020, with export prices fluctuating between \$180/kWh to \$320/kWh depending on battery chemistry and regional policies. Lithium-ion systems dominate 78% of exports, but emerging alternatives like sodium-ion are. A sound certification strategy has become a key factor for successful product export. This article comprehensively analyzes the certification requirements for portable energy storage power supplies in major global markets, providing a systematic reference guide for manufacturers. Exporting portable. The Portable Lithium Energy Storage Market was valued at 7.72 billion in 2025 and is projected to grow at a CAGR of 9. Growing trends in mobility, such as camping, hiking, and the use of recreational vehicles, are expected to impact the product. Discover how geopolitical shifts, material costs, and technological innovations are reshaping energy storage export prices worldwide. In February 2023, the Standardization Administration of China and the National Energy Administration issued the Guidelines on the.
