

Power generation of solar power stations in India

Overview

3 GW of wind capacity in calendar year (CY) 2025 (January to December), marking its highest annual renewable energy additions to date. 7%, while wind additions surged 85. As of 2025, it is now India's third largest source of electricity behind hydro. The Indian government set an initial capacity goal of 20 GW for 2022, which was met four years ahead of schedule. In. If you wish to proceed, click on Connect. Electricity generation from solar power in India - Chart and data by the International Energy Agency. India's solar energy market is experiencing significant and rapid growth, establishing itself as a global leader in solar power deployment. 6 GW of new solar installations. The CIAL Solar Power Project is a 50 MW photovoltaic power station located at. Solar additions in calendar year 2025 comprised 28.

Power generation of solar power stations in India

Solar energy in India

Indeed, in 2023, India was the third-largest solar energy producer in the world, adding over 16.6 GW of new solar installations. This growth is driven by ambitious government targets,
