

Pretoria Solar Base Station Battery Announcement

Overview

In October 2024, Scatec reached financial close for a battery energy storage project totalling 103 MW/ 412 MWh by the Department of Mineral Resources and Energy in South Africa under the Battery Energy Storage Independent Power Producer Procurement Programme (BESIPPPP). The power will be dispatched. The solar deep-cycle battery bank stores the electrical energy generated by the solar panels, ensuring a stable power supply to the communication base stations even when there is no sunlight or insufficient sunlight. It combines photovoltaic panels, charge controllers, inverters, and lithium or hybrid battery systems into one durable, transportable package. That's not sci-fi - it's happening right now in Burkina Faso's capital.

Pretoria Solar Base Station Battery Announcement

Pretoria new energy storage project

With an installed solar capacity of 540 MW of PV, and a battery storage capacity of 225MW/1,140MWh, the plant is designed to deliver 150 MW of dispatchable power from 5 am to 9.30 pm year-round
