

Programmable DC Uninterruptible Power Supply

Overview

Modern programmable DC power supply designs often require: Power levels ranging from 50 W to over 1 kW at various voltage and current levels. Support for variable rise/fall times, nano-level resolution and mixed signal I/Os. Precise DC and AC operation with low drift over time. From benchtop and modular power supplies to rack-mounted industrial power subsystems, AMETEK Programmable Power is a leader in designing and manufacturing precision, programmable, and multiple-channel DC power supplies. Ranging from 30W to 150kW, Sorensen DC power supply products are used in R&D. TDK-Lambda is a global supplier of Programmable DC power with the most comprehensive standard offering of bench-top/rack-mount DC Programmable Power Supplies from 200W to 22.5kW and Rack DC Systems from 30kW to 90kW. Need help?

. Check our COMPARISON CHART and choose the right UPS for your application! The OpenUPS2 was designed to provide user specified regulated power output from a wide input voltage or battery backup, microprocessor assisted LiFePO4 battery charging and cell balancing in a single PCBA. A unified control platform and over 160,000 configurations let you precisely match voltage and current needs—from lab benches to multi-megawatt industrial. A programmable power supply delivers precise, adjustable voltage and current with automated control for circuit testing, validation, and production. With advanced programmability and remote operation, it ensures accurate, repeatable measurements in R&D, manufacturing, and automated test.

Programmable DC Uninterruptible Power Supply

Programmable Power Supplies , McMaster-Carr

Choose from our selection of programmable power supplies in a wide range of styles and sizes. Same and Next Day Delivery.

- LiFePO₄
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years

Programmable Power Supply

Power your tests with programmable voltage and current control in a compact benchtop design. With high accuracy, remote operation, and advanced sequencing, it's built for automation and precision.
