

Project achievements of solar power generation

Overview

DOE research and development efforts have accelerated solar industry progress by an estimated 12 years. Learn more about these key events from 1955 to present. Department of Energy's (DOE) Solar Energy Technologies Office (SETO) was tasked with achieving the goals of the SunShot Initiative: to drive down the cost of solar electricity to be fully cost-competitive with traditional energy sources by the end of the decade. SunShot builds on. As of 2025, solar energy continues to lead the global shift towards renewable resources, with significant advancements in large-scale projects, community solar initiatives, and innovative applications like agrivoltaics. Meet the real solar giants powering our world, and the next ones ready to outshine them. Vast, unstoppable, and life-giving. But how is solar. Electricity generation by the U. In our latest Short-Term Energy Outlook (STEO), we expect U. 6% in 2027, when it reaches an annual total of 4,423 BkWh. 81 GW ^Large Hydro includes 7175. 2025 For more details, Click below .
