

# Reduced carbon emissions andorra city

## Overview

---

Recognizing climate change as a critical global challenge, Andorra has implemented several policies targeting emissions reduction in various sectors, including energy, transportation, and waste management. One of the cornerstone policies involves the implementation of renewable energy. The results show that achieving the decarbonization objectives would require very substantial efficiency gains in the power, transport, and residential sectors and a considerable increase in the carbon tax and. Although Andorra is responsible for less than 0.001% of the world's global greenhouse gas (GHG) emissions, it is a high mountain territory particularly vulnerable to the effects of climate change, and as article 4. This breakdown is strongly influenced by the energy mix of a given country, and changes as a country shifts to or from a given energy source. It uses the euro as its national currency.
