

Singapore all-vanadium redox flow battery

Overview

Singapore's VFlowTech has secured a substantial \$20.5M funding round to accelerate deployment of its vanadium redox flow batteries that aim to offer long-duration storage. Avishek Kumar, co-founder and CEO of VFlowTech

Photo: VFlowTech The company is currently working on a. Dr Avishek Kumar co-founded VFlowTech, a Singapore-based company pioneering energy storage solutions using vanadium redox flow battery technology. Can you explain what this technology is about and. Vanadium redox flow battery (VRFB) company VFlowTech has raised investment to scale up its manufacturing, extend its reach and enhance the digital capabilities of its tech. Their PowerCube system supports renewable energy integration in grid storage, EV charging, and industrial applications. Committed to energy equity, VFlowTech.

Singapore all-vanadium redox flow battery

A comprehensive review of vanadium redox flow batteries: Principles

The Vanadium Redox Flow Battery (VRFB) has recently attracted considerable attention as a promising energy storage solution, known for its high efficiency, scalability, and long cycle life.
