

Solar Onsite Energy Solar Power

Overview

Onsite solar is generating and utilizing clean energy directly with the ability to either A. use the power and sell the overage to the local utility. It involves the deployment of solar panels or photovoltaic (PV) modules on rooftops, parking lots, or other available spaces on the. Onsite solar is an asset installed in the same location where the energy generated will be consumed. For each kilowatt-hour (kWh) the onsite solar asset produces, a kWh of consumption will be offset for a buyer of renewable energy, or offtaker. These systems are often described as “behind the. Solar Panel System (usually on a rooftop): Those shiny panels on your roof don't just look nice; they convert sunlight into electricity, allowing you to tap into renewable energy while saving on monthly energy costs.
