

# Solar Photovoltaic Power Generation Canopy

## Overview

---

A solar canopy, which is a raised structure fitted with solar panels, captures sunlight and transforms it into usable electricity. Unlike traditional solar installations that are mounted on rooftops or open fields, solar canopies make use of vertical space, providing both shade. Lumos Solar Canopies are all about enhancing spaces with sustainable design. The Lumos product catalog contains the right solar canopy for your design: from our impressive solar panel shade structures and prefabricated solar pergolas to our award-winning solar walkways and stylish solar sculptures. It can be a walking area, parking space, or any outdoor spot. Got a driveway that sits empty all day?

A flat roof. Residential and commercial solar canopies offer dual functionality that traditional roof panels can't match - they generate clean energy while creating useful covered spaces for vehicles, patios, or outdoor living areas. While solar canopies cost 20-40% more upfront than roof systems, they can add.
