

Solar Range in Spain

Overview

Spain revels in one of Europe's sunniest climates, with an annual average solar irradiation of 4. The southern plains, like Andalusia, and the Canary Islands bask in top-tier sunlight, fueling Spain's status as a solar powerhouse. 5 GW, of which. Spain marked a clean energy milestone in July 2025, according to APPA Renovables' latest monthly report. Renewables generated 13,871 GWh, covering 55.1% of the national electricity mix. The figures. 2024 was once again a record year for solar photovoltaic generation in Spain, as it set a new all-time annual high, this time reaching 44,520 GWh, an increase of 18. With the goal of reaching climate neutrality by 2050, the country is implementing measures to achieve a 100 percent renewable electricity mix by that year. Although wind is currently the most used renewable resource in the. Renewables now account for 66% of Spain's installed power capacity In 2024, solar PV recorded its best year ever: it generated 44,520 GWh, representing 17% of the country's total electricity production According to data from Red Eléctrica, solar photovoltaic (PV), with a total capacity of 32,043. Spain solidified its position as a European solar powerhouse in 2025, adding a remarkable 7.85 GW of new renewable installations last year, underscores the immense potential and profitability of Spanish.

Solar Range in Spain

Spain Renewables Top 55% of Power in July, Solar PV Leads

Spain marked a clean energy milestone in July 2025, according to APPA Renewables' latest monthly report. Renewables generated 13,871 GWh, covering 55.1% of the national electricity mix. Solar PV ...
