

Solar container lithium battery cylindrical cube

Overview

Built for serious energy independence, the Li-Cube Microgrid Kit delivers a complete, pre-wired off-grid or hybrid power system inside a compact, white weatherproof container. It features a cylindrical lithium-ion battery module featuring a compact hybrid cooling system integrating PCM and heat pipes. The batteries are closely arranged, and the vacant spaces between them are filled with either heat pipes or PCM tubes, as illustrated in Figure 23. Introducing the 24kW Li-Cube Container with 36 kWh of Battery Reserve by Volts Energies - Your Ultimate Off-Grid Power Solution! Equipped with a 20kW generator, 2x 12kW hybrid solar inverters, 12X US3000C Pylontech Lithium Batteries, various Victron Energies products, and 20X Vsun. Available in two configurations, each system includes high-efficiency bifacial solar panels, reliable Victron. From choosing the right panels and batteries to handling the wiring and setup, building a system from scratch can be complicated, especially when you're looking for something quick, reliable, and off-grid-ready. That's where pre-built, solar-ready container systems come in.
