

Solar energy storage system with on-site energy

Overview

These systems, which are considered as “behind-the-meter” (BTM) systems, allow facilities to maximize the benefits of on-site renewable generation. □ BTM systems give facilities the option to reduce demand charges¹ imposed by the utility and leverage time-of-use rates² to lower. Installing on-site renewable energy systems is a common strategy facility owners can use to save money, reduce their greenhouse gas emissions, and add resiliency to their facilities by generating their own electricity. Many facilities have recognized the advantages of on-site renewable energy. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. Coupling solar energy and storage technologies is one such case. Topics in this guide include factors to consider when designing a solar+storage system, sizing a battery system, and safety and environmental considerations, as well as how to value and finance solar+storage. The guide is organized around 12 topic area questions. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. Understanding Solar Storage

Millions of solar projects have been installed in the US; and while most solar installations do not include any form of energy storage, pairing solar with battery storage has become increasingly common.

Solar Integration: Solar Energy and Storage Basics

What Is Energy Storage? Advantages of Combining Storage and Solar
Types of Energy Storage
Pumped-Storage
Hydropower
Electrochemical

StorageThermal Energy StorageFlywheel
StorageCompressed Air StorageSolar
FuelsVirtual StorageThe most common
type of energy storage in the power grid
is pumped hydropower. But the storage
technologies most frequently coupled
with solar power plants are
electrochemical storage (batteries) with
PV plants and thermal storage (fluids)
with CSP plants. Other types of storage,
such as compressed air storage and
flywheels, may have different char See
