

# Solar energy uzbekistan

## Overview

---

This article will delve into the latest statistics on solar energy development in Uzbekistan, reviewing the key achievements of 2024 and outlining the ambitious plans set for 2025 and beyond. This staggering figure represents a 21-fold increase compared to the previous year, underscoring the rapid and ambitious growth of solar energy in the country. Uzbekistan is making significant strides in its transition to renewable energy, driven by a clear vision for a sustainable future and. Uzbekistan has great renewable energy potential, especially for solar energy. 7mn) in state subsidies for household solar electricity in 2025, with 45,381 individuals compensated for power generated by rooftop solar panels and supplied to the national grid, according to the State Tax Committee. As of 2024, the country operates 91 power plants with a combined installed capacity of 21,398 MW, of which thermal sources account for 79%, hydropower. Shamsiev Bakhtiyor Khamidillaevich is the Head of the Power Systems' Electrical Modes Department in the Coordinating Dispatch Centre 'Energia' since 2019, participates in the development of schemes and electrical modes of the Central Asian Unified Power System in short -term and long- term.
