

Solar inverter growth trend chart

Overview

The Solar PV Inverters market is expected to grow from USD 14.7 million by 2030, growing at a CAGR of 18. The market's expansion is underpinned by a move from simple DC-to-AC conversion toward smart, grid-forming. The solar PV inverter market attained a value of USD 8. More than 45% of new solar installations now feature smart inverter solutions, while over 30% incorporate hybrid energy systems. The market, currently valued at approximately \$15 billion (estimated based on).

Solar inverter growth trend chart

Solar Inverter Market Share, Growth & Trends Analysis 2032

On-grid solar inverters dominate the market in 2024, accounting for roughly 65% of installations due to their efficiency and grid connectivity for residential, commercial, and utility-scale projects.
