

Solar module export supply

Overview

According to Volza's Global Export data, World exported 88,345 shipments of Solar Module from Nov 2023 to Oct 2024 (TTM). These exports were made by 5,693 Exporters to 6,084 Buyers, marking a growth rate of -29% compared to the preceding twelve months. Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity - ten times more than Europe - and created more than 300 000 manufacturing jobs across the solar PV. The adoption of solar energy is growing rapidly worldwide, with cumulative installations amounting to more than 2.2 terawatts as of the end of 2024. The year's key test lies in effectively. Volza's Big Data technology scans over 2 billion export shipment records to identify new buyers, profitable markets, reliable suppliers, and promising products. Reciprocal tariffs were effectively reduced from 50% to 18%. The Visakhapatnam port in India Image: eclicks_by_bunny, Wikimedia Commons, CC BY-SA 4.
