

Solar n-type double-glass modules

Overview

With high module efficiency (23.0 mm glass construction, it delivers excellent energy yield, lower LCOE, and long-term reliability for commercial and large residential arrays. The JA Solar JAM72D40-595/MB-US is a 595 W n-type, double-glass bifacial module built on DeepBlue 4.0%, robust 1500 V DC design, and double 2.0 Pro platform, this module delivers superior energy yield, long-term reliability, and lower. Interest in N-type bifacial modules has rapidly increased due to their ability to generate more power than conventional P-type bifacial thanks to their higher bifacial factor, lower degradation, lower temperature coefficient in addition more energy density and power class. Bifacial solar cells can. Maximizes power density per module, reducing module count, racking, and overall BOS costs for large-scale projects. 0 series represent advanced solar technology with high-efficiency Mono-PERC cells and a 16-busbar design that enhances low-light performance and increases power output to 615~640W per module.

Solar n-type double-glass modules

JA Solar 600W N-Type Bifacial Double Glass Modules , JA Solar Modules

JA Solar JAM72D40 600W N-Type Bifacial Double Glass Module offers exceptional durability and efficiency for residential, commercial, and utility-scale installations. Engineered as a high-efficiency ...

JA Solar 605W N-Type Double Glass Bifacial Module

Unlock superior solar performance with the JA Solar 605W N-Type Bifacial Double Glass Solar Panel. This cutting-edge module leverages advanced N-type cell technology and an innovative bifacial ...

[Get Price](#)

For N-type Bifacial Technology, Dual Glass Structure is Preferred

Dual glass is the preferred structure for the rear side cover of the N-type modules because the glass-glass version can maximize the advantages of the N-type.
