

Solar panel subsidies in Sao Tome and Principe

Overview

Since 2021, São Tomé's government has rolled out tax exemptions for solar imports and feed-in tariffs for excess energy. What's next?

. The government has identified renewable energy, particularly solar, as a key pillar for achieving energy independence, reducing costs for its citizens and businesses, and promoting sustainable economic growth. This strategic priority is formalized through the country's Private Investment Code. This. eatest opportunities to São Tomé and Príncipe. On one hand, global climate change poses a direct threat to our way of life; on the other, continued reliance on outdated fossil energy sources, uch as imported diesel, is no longer sustainable. 5 should be supported with policies to reduce energy intensity and increase its access (Target 7. 1) and efficiency to mitigate the negative impact on the share of renewable Smart grid management, energy storage to cope with large penetrations of renewable energy and. This initiative aims to enhance the reliability and sustainability of the nation's energy supply while raising the renewable energy share in the country's energy mix to 50% by 2050. Although around 70% of rural areas in STP are electrified, many communities remain off-grid or face unreliable supply.
