## Overview

---

More than 60 photovoltaic plants currently operate in El Salvador. Most of them are in private hands and usually take the form of solar panels installed on the rooftops of warehouses, supermarkets, and industrial buildings. 6 million, according to data from the Ministry of Housing. Between 2015 and 2023, El Salvador experienced a 160-fold increase in its solar energy generation capacity, according to statistics from the Latin American Energy. The global push for renewable energy is gaining unprecedented momentum, with rooftop solar emerging as a key driver for change in residential, commercial, and industrial sectors. While the progress is commendable, particularly in solar, there is still ample room for further development and investment in the country. The growth. The Western Green Energy Hub (WGEH), touted to be the world's largest renewable energy project, has begun its first round of public consultation. This one-of-a-kind energy project, which is bigger in area than the entire country of El Salvador, has the potential to revolutionize renewable energy. El Salvador is poised to lead the region in solar energy by 2025, thanks to a significant increase in solar-powered plants and a decisive shift toward renewable energy sources.

## Solar panels solar power plant in El Salvador

### Power plant profile: Providencia Solar PV Park, El Salvador

Providencia Solar PV Park is a ground-mounted solar project which is spread over an area of 81 hectares. The project supplies enough clean energy to power 200,000 households, ...
