

# Solar power generation and hydropower transformation drawings

## Solar power generation and hydropower transformation drawings

---

### The flow of water produces hydroelectricity.

Falling water produces hydroelectric power. The theory is to build a dam on a large river that has a large drop in elevation (there are not many hydroelectric plants in Kansas or Florida).

### How Hydropower Works

Hydropower, or hydroelectric power, is a renewable source of energy that generates power by using a dam or diversion structure to alter the natural flow of a river or other body of water.

### Hydroelectric power generation diagram [9]

Hydro turbine is one of the important components in hydropower plants, which makes mechanical power from the available hydro potential and is used to drive the generator to generate electricity.

## Solar, Wind, and Hydro Energy Hybrid Power Generation System

In this present paper, inclusive literature is conducted on three energy sources i.e., solar, wind, and hydro. This paper

will try to provide summaries of the studies conducted during setting up this
