

# Solar power generation fault code 125

## Overview

---

Error Code 125 typically indicates a grid configuration parameter issue. This can affect system performance and requires immediate attention. This can occur due to improper settings that do not align with the utility grid specifications, such as voltage and. Confirm whether the power setting of the inverter Power Control is limited 4. If it's turned on, the LimByEPM message can occur. Learn how to reset inverter faults, understand solar inverter fault codes, and troubleshoot solar inverter errors in home solar systems. If you're dealing with recurring faults or don't have support from your original installer, GreenLancer can help.
