

Solar power generation supervision system

Overview

We connect in various ways: directly via API, via an intermediate data logger (e. Solar Log, Webdynsun), via a power plant controller, via FTP. Small scale installations for home- or apartment owners. Commercial and Industrial applications, such as offices and warehouses.) on an HMI, creating a reliable system. Manage your own solar portal and customize everything - from alert threshold down to branding. “With our All-In-One platform, we empower solar installers & maintenance companies to report alert & analyze in a unified manner, while serving as a whitelabel customer portal to reinforce their brand” We. The Solar Field Control System developed by Ingeteam is an autonomous and independent system from Distributed Control System of the Power Block. Our products are 100% designed and manufactured in the USA. Our goal is to deliver problem-solving solar solutions with solar site visibility on a global reach.

Solar power generation supervision system

Supervisory System for On-Grid Solar Power Plant

The supervisory system aims to regulate the solar power plant system so that it should not exceed the load consumption power but not reduce the productivity of the solar power plant system itself.
