

Solar power generation system in Burkina Faso

Overview

The Government of Burkina Faso has signed a Public-Private Partnership (PPP) agreement with a local developer and a Dutch clean energy investment firm to develop a major solar and battery storage system. This state-of-the-art facility, valued at \$50 million, will produce 200,000 solar panels annually. This 18-megawatt (MW) solar initiative, backed by strategic financial commitments from the Sustainable Energy Fund for Africa (SEFA) and the African. Since the last iteration, significant progress has been made with the successive commissioning of new solar power plants in Burkina Faso in 2024, and the continuation of electrification efforts despite the security crisis. The national coverage rate has increased to 50%, compared to a national.
