

Solar power generation with energy storage in chile

Overview

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The country as part of that ambition has a goal of producing at least 70% of its electricity from renewable energy by the end of. Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022. The context: The South American nation's brisk shift to clean electricity was sparked by staunch community opposition to traditional power projects.
