

Solar power sold to the grid

Overview

Solar net metering is a smart, rewarding way to get the most out of your solar panel system. It works by sending extra electricity your panels produce back to the power grid, sometimes even letting you sell solar energy back to the grid. In return, you earn credits that can lower. For years, selling home solar energy followed a simple script: generate more power than you need, send the extra to the grid, and let utility credits shrink the bill. This article provides an overview of: We'll also discuss tax implications, the federal investment tax credit, and the. Find the best solar pros in your area. The Modernize Mission We help homeowners make confident decisions through our reliable, up-to-date, and unbiased information and average project costs. All of our content is thoroughly reviewed and fact-checked by our team of home improvement experts. At the end of the year, if you have credits leftover, you have the option to continue to.
